1. **Refresh**: Refresh the current page.
2. **Search**: Search for races.
3. **ID**: Unique ID generated by the system for each race.
4. **Timer**: Timer ID.
5. **Race**: List of races under this account.
6. **Type**: Type of race.
7. **Date_Time**: Date and time when the race is held.
8. **Banner**: Background image for score display.
9. **FW Token**: A unique identifier for each race. It allows that **Feibot Workbench** to access and show race data from the scoring software.
10. **Created At**: Time when the race was created.
11. **Updated At**: Time when race details were last modified.
12. **Action**: Options to view, edit, or copy race details.
13. **+New**: Create a new race.

Race Creation Interface

The screenshot shows the 'Create' page of the Felbet application. It features a sidebar with navigation icons and a main form area. The form is divided into two sections: 'Race' and 'Add Item'. The 'Race' section contains fields for Race name, Type, Date, Time, Milli Sec, Banner, Logo Img, and Device. The 'Add Item' section contains fields for Item Title, Timing, Type, Distance, and a list of items with a 'Remove' button. The form is annotated with numbers 1 through 10, corresponding to the legend below.

1 *Race

2 *Type

3 *Date

4 *Time

5 Milli Sec

6 Banner

7 *Device

8 +New

A Item Title

B Timing

C Type

D Distance

E Remove

9 Reset

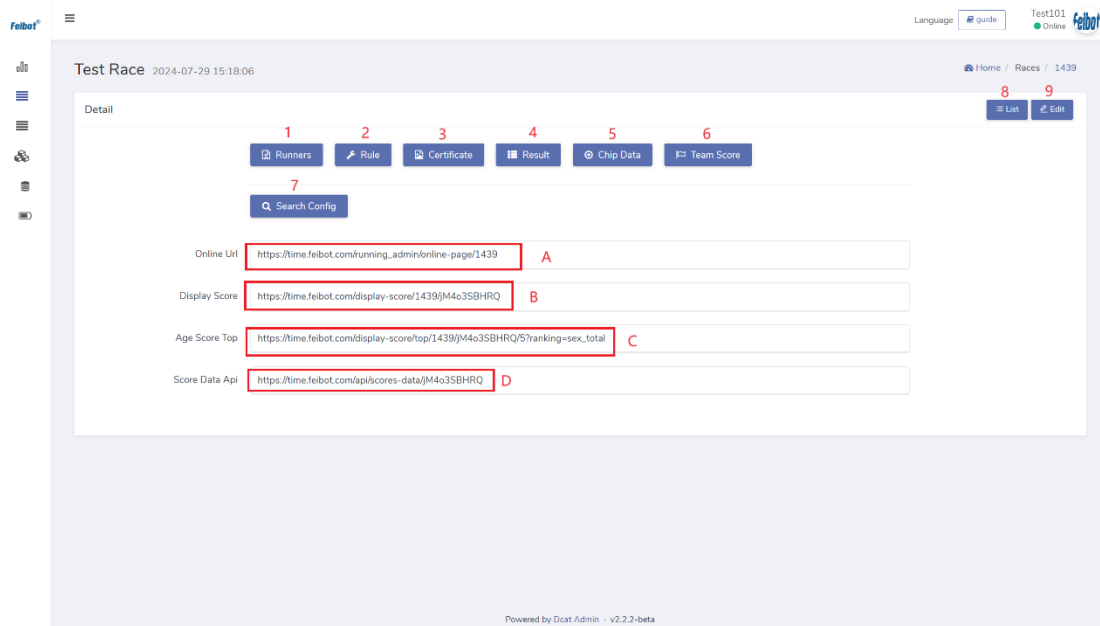

10 Submit

1. **Race:** Name of the race.
2. **Type:** Type of race (e.g., running, triathlon).
3. **Date:** Start date of the race.
4. **Time:** Start time of the race.
5. **Milli Sec:** Milliseconds for precise timing.
6. **Banner:** Background image for score display interface, accessible via the “[Display Score](#)” feature.
7. **Device:** Device equipped for this race.
8. **+New:** Add new items.
 - A. **Item Title:** Title for race items (e.g., 1KM, 5KM, triathlon).
 - B. **Timing:** Enable or disable timing for the race. (No timing option is for some entertaining items not need to time)

- C. **Type**: Choose race type (normal, team, relay).
 - D. **Distance**: Distance from start to finish points.
 - E. **Remove**: Delete this item.
9. **Reset**: Clear all settings to the default state.
 10. **Submit**: Submit race details to the system.

*****: necessary field

Race Interface

1. **Runners:** Upload runner list.
 2. **Rule:** Set up race rules.
 3. **Certificate:** Set up certificates.
 4. **Result:** Check and edit results.
 5. **Chip Data:** Check and edit chip data.
 6. **Team Score:** View team scores.
 7. **Search Config:** Settings for the score query feature, which generates a [link for result query](#).
(This link is similar to the “score display” link but offers a different method for displaying or querying of the scores. Therefore, this configuration is optional.)
 8. **List:** Navigate to race list.
 9. **Edit:** Edit race details.
-
- A. **Online URL:** URL for online score display.
 - B. **[Display Score](#):** Link for score display.
 - C. **Age Score Type:** Link for age-based score display.
 - D. **Score Data API:** Link for score data access.

Runner Interface

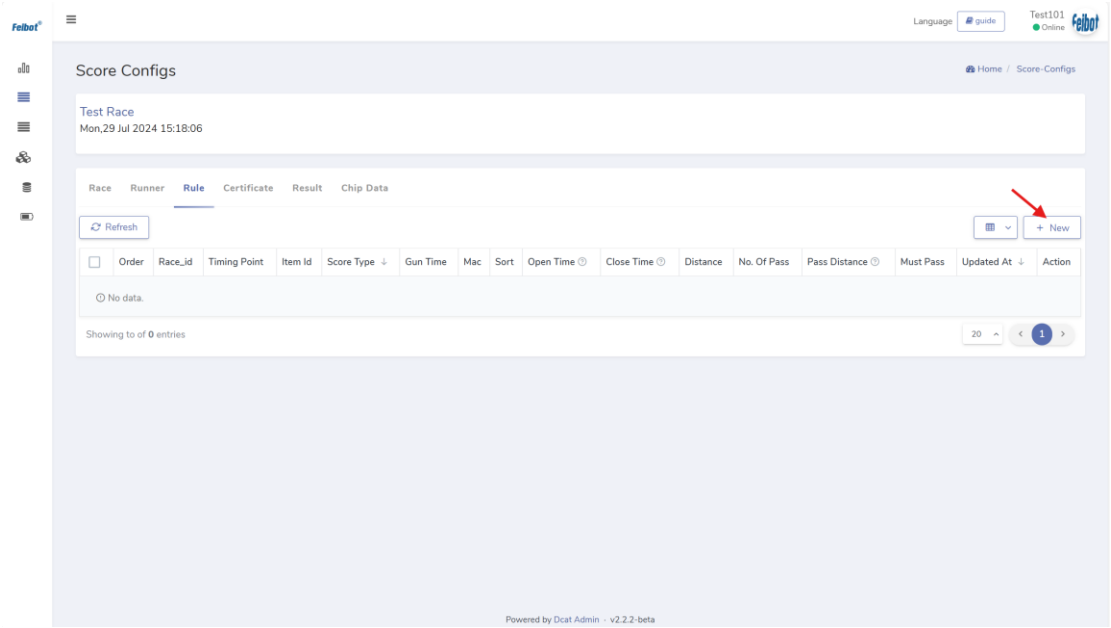

The screenshot shows the 'Runner' interface in the Feibot application. At the top, there's a header with 'Test Race' and the date 'Mon, 29 Jul 2024 15:18:06'. Below this is a table with columns: Race, Runner, Rule, Certificate, Result, and Chip Data. The 'Runner' column is active, showing a list of three runners. Above the table, there are four buttons: 'Refresh' (1), 'Filter' (2), 'Import' (3), and 'CheckConfig' (4). To the right of the table, there are three buttons: 'Selector Column' (5), '+ New' (6), and 'Export' (7). Below the table, there is a dropdown menu for 'Action' (8) with options like 'ID', 'bib', 'name', 'surname', 'item', 'gender', 'epc', 'country', 'city', 'id card', 'birthday', 'age group', 'age', 'phone', 'email', 'team', 'team index', 'type', 'check in', 'created at', and 'updated at'. The table itself has columns: Bib, Name, Item, Gender, Epc, and Age Group. The first three rows of data are visible.

Bib	Name	Item	Gender	Epc	Age Group
1001	Joy	1KM	m	000000000005200000000578	GENERAL
1002	Ross Gellar	1KM	m	000000000005200000000585	GENERAL
1003	Chandler	1KM	f	000000000003300000000578	GENERAL

Showing 1 to 3 of 3 entries

1. **Refresh:** Refresh the current page.
2. **Filter:** Filter participants' information using keywords (e.g., "female" to check all female participants).
3. **Import:** Import the runner list via Excel.
4. **Check Config:** Configuration settings for checking participants.
5. **Selector Column:** Select which title to display on the runner page.
6. **+New:** Add a new runner.
7. **Export:** Export the runner list template.
8. **Action:** Options to edit or delete runner information.

Rule Interface

- **+New:** Set up new rules.

16 Submit

1. **Timing Point:** Specific locations where participants' times are recorded (e.g., start point, checkpoint, finish point).
2. **Items:** The item already set in the new race creation interface.
3. **Areas:** Designated sections for different participant categories.
4. **Score Type:** Scoring based on different timing points (start, finish, checkpoint).
5. **Gun Time:** The time when the gun starter launches.
6. **Milli Sec:** Milliseconds for precise timing.
7. **Mac:** Device equipped for this timing point.
8. **Open Time:** Time when the data processed by the software becomes valid.
9. **Close Time:** Time when the data processed by the software becomes invalid.
10. **Increase Days:** Extend close time if the race lasts over multiple days.
11. **Auto Calculate:**

- **No:** Software does not automatically calculate scores.
 - **Yes:** Allow the software to automatically calculate scores.
12. **Must Pass:**
- **No:** Participant's score is valid although they do not pass the timing point.
 - **Yes:** Participant's score is valid only when they pass the timing point.
13. **Fastest Speed:** Establish a speed limit for the race. This serves as a baseline for the software to determine valid results.
14. **Motion Type:** Specify the type of motion (running or motor).
15. **Reset:** Clear all settings to the default state.
16. **Submit:** Submit the rules to the system.
17. **List:** Go back to "rule" interface.
18. **Delete:** Delete this rule.

*****: necessary field

– Other timing points

Other timing points have several different fields from the start one.

The screenshot shows the 'Edit' form for a timing point in the Feibot system. The form is divided into several sections. The top section includes fields for 'Timing Point', 'Items', 'Areas', 'Score Type', and 'Start Time Id' (highlighted with a red box and labeled 1). Below this is the 'Distance' field (highlighted with a red box and labeled 2), followed by the 'Sort' field (highlighted with a red box and labeled 3). The 'Live Broadcast' field (highlighted with a red box and labeled 4) and the 'How Many Passes' field (highlighted with a red box and labeled 5) are also present. The bottom section includes fields for 'Mac', 'Open Time', 'Close Time', 'Increase Days', 'Auto Calculate', 'Must Pass', 'Fastest Speed', and 'Motion Type'. The form is titled 'Edit' and has buttons for 'List' and 'Delete' at the top right. The footer indicates 'Powered by Dcat Admin - v2.2.2-beta'.

1. Start Time Id: The item already set in the start timing point.
2. Distance: The distance from a starting point.
3. Sort: **a.** first time record; **b.** last time record
 - a. Choose the first record time of a participant when passing the timing point.
 - b. Choose the last record time of a participant when passing the timing point.
4. Live Broadcast: Enable real-time result checking for participants.
5. How many Passes: The times when participates pass this timing points.

1. **Import Data:** Import chip data from a CSV file.
2. **Delete Data:** Delete chip data based on device serial number.
3. **+New:** Add chip data manually.
4. **Export:** Export chip data as an Excel file.
5. **Action:** Options to edit, delete, or clone data.

Team Configs Interface

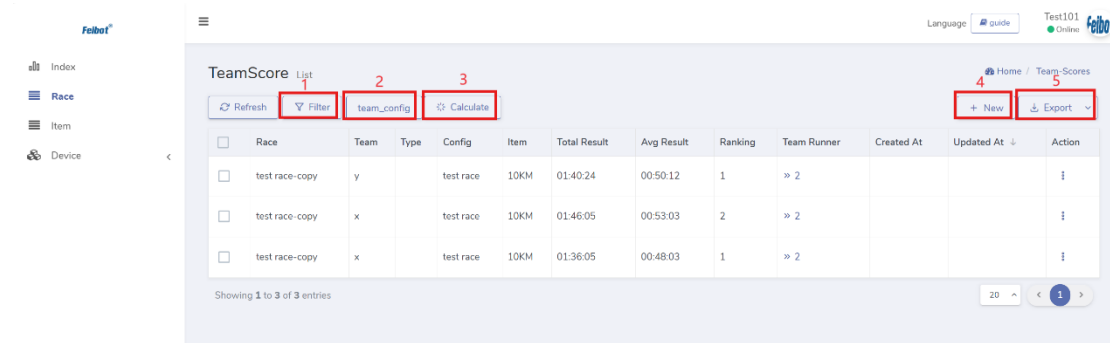

1. +New: Set up teams.
2. Action: Edit and delete teams
3. Team score: Calculate the team score.

1. **Title:** Race ID.
2. **Item:** Item ID.
3. **Type:** It refers to the types in the list table. (if not available, leave blank)
4. **Num People:** Total number of participants.
5. **Num Female:** Number of female participants.
6. **Fixed:** Whether to fix the gender ratio, such as 4 male and 1 female.
7. **Score Type:** Score by net time or gun time.
8. **Time or Ranking:** Determine the winner by time or ranking.
9. **Female Cut:** Time cutoff for female participants.
10. **Statistic:** Score based on sum total or last record.

Team Score Interface

1. **Filter:** Check team score through item id or team config id.
2. **Team_config:** Return to the team config page to edit teams.
3. **Calculate:** Calculate the team score.
4. **+New:** Create a team score.
5. **Export:** Export the team score.

Search Config Interface

The screenshot displays the 'Search Config Interface' within a web application. The interface is titled 'Create' and includes a sidebar with navigation icons. The main content area contains the following fields and controls:

- Language:** A dropdown menu with 'en' selected. It is highlighted with a red box and labeled '1'.
- Abstract:** A text input field with 'en' entered.
- Address:** A text input field with 'Thailand' entered.
- Banner Img:** A large image upload area with a 'Browse' button and the text 'Or drag file here'. It is highlighted with a red box and labeled '2'.
- QR Code Or Logo:** A smaller image upload area with a 'Browse' button and the text 'Or drag file here'.
- Ranking:** A radio button.
- Point:** A radio button.
- Certificate:** A radio button.
- Name:** A text input field with a placeholder 'Input name'.
- Phone:** A text input field with a placeholder 'Input phone'.
- Email:** A text input field with a placeholder 'Input email'.
- Home:** A text input field with a placeholder 'Input home'.
- Active:** A toggle switch.
- Reset:** A button at the bottom left.
- Submit:** A button at the bottom right.

The footer of the interface indicates 'Powered by Dcat Admin - v2.2.2 beta'.

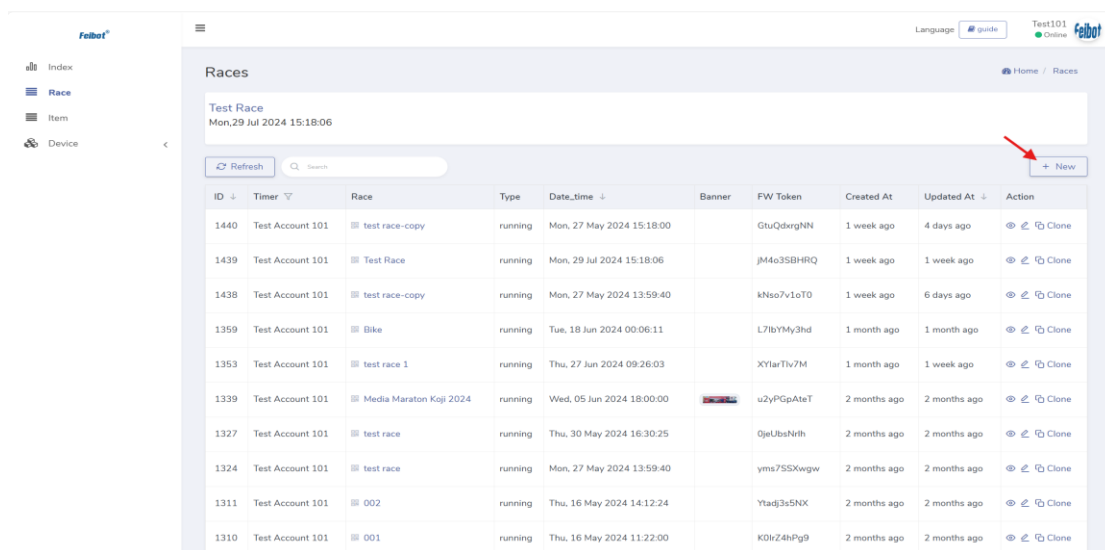

1. **Language:** Four language options: English, Chinese, Thai, Korea.
2. **Banner Img:** Background image for score query interface.

Set Up Feibot Scoring Software

- Pre-event

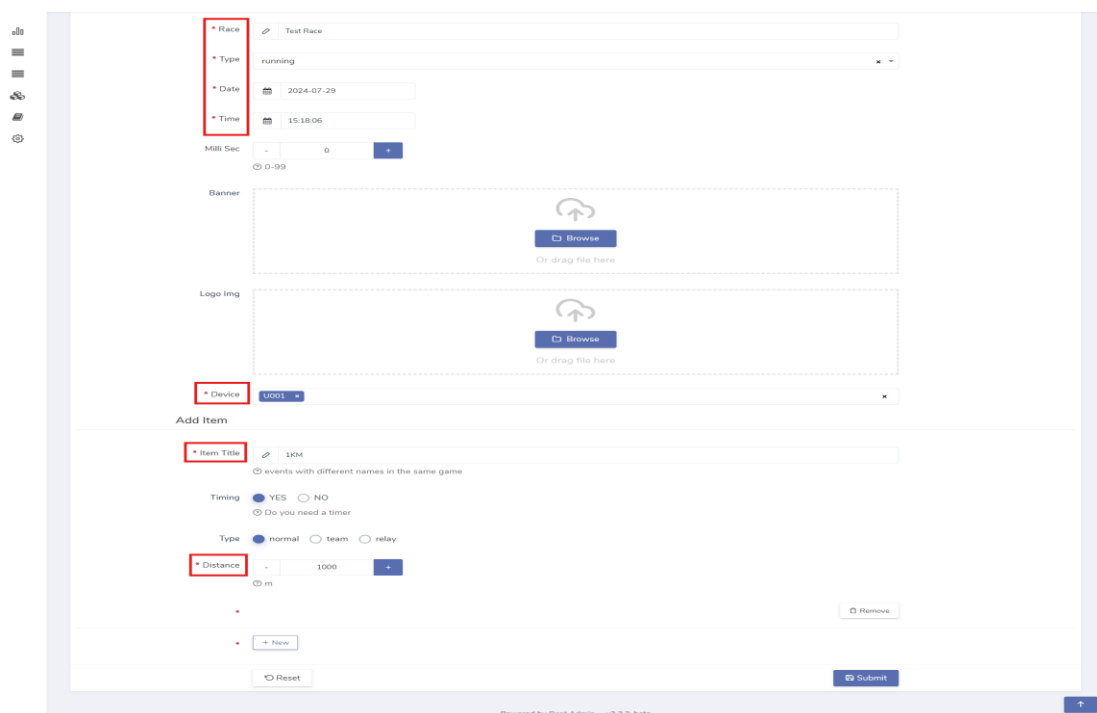

1. Configure the Race

Create New Race: Click “+New” to access the Race Creation Interface. Enter details such as event name, date and time, items and equipped devices.

The screenshot shows the 'Races' management page in the Feibot software. The page has a sidebar with 'Index', 'Race', 'Item', and 'Device' options. The main content area displays a table of existing races. A red arrow points to the '+ New' button located in the top right corner of the table's header area.

2. Entering Participants

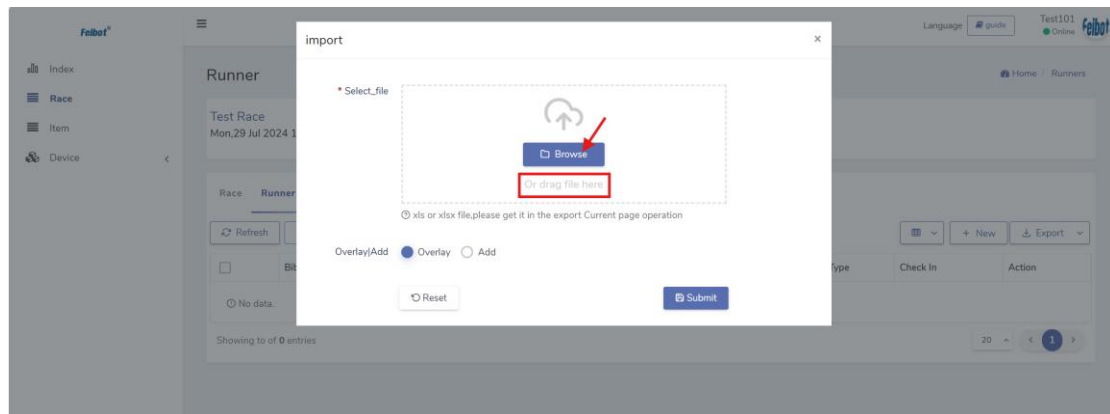

1) Import Runner list:

- Prepare your original runner list
- Export the runner list template from our software
- Copy the required info from the original runner list and stickup it to the runner list template

2) Notes:

- Bib, item, name, gender** and **EPC** are necessary info
- Item must be the same as the one edited in the new race creation interface.
- Bib, EPC are the unique info, so ensure there is **no duplicate bib and EPC**.
- When copy and stickup the original participants' info to the runner list template, you should **stickup them as values** to the template. Please ensure no other edits made, as this could cause unseen format mismatches.

3. Set Up Scoring Rules

Define Rules: Click **Rule/+New** to access the Rule Setup Interface. Set up the scoring rules, such as timing points, score type, equipped devices, open time and close time, ect.

The screenshot displays the Feibot Score Configs interface. The top navigation bar includes 'Language', 'guide', 'Test101', and 'Online'. The left sidebar shows 'Index', 'Race', 'Item', and 'Device'. The main content area is titled 'Score Configs' and shows 'Test Race' on 'Mon, 29 Jul 2024 15:18:06'. The 'Rule' tab is selected, and a '+ New' button is highlighted with a red arrow. Below the tabs is a table with 15 columns: Order, Race_id, Timing Point, Item Id, Score Type, Gun Time, Mac, Sort, Open Time, Close Time, Distance, No. Of Pass, Pass Distance, Must Pass, Updated At, and Action. The table contains two entries: '1km start' and '1km finish'. Below the table, it says 'Showing 1 to 2 of 2 entries'. The bottom section is the 'Rule Setup' form, which includes fields for Timing Point, Items, Areas, Score Type, Start Time Id, Distance, Sort, Live Broadcast, How Many Passes, Mac, Open Time, Close Time, Increase Days, Auto Calculate, Must Pass, Fastest Speed, and Motion Type. The 'Timing Point' and 'Score Type' fields are highlighted with red boxes. The 'Mac' field is also highlighted with a red box. The 'Open Time' and 'Close Time' fields are highlighted with red boxes. The 'Submit' button is at the bottom right.

Notes:

A. **Open time and close time:**

1. The open and close times for timing points are determined relative to the event start time. For example, if an event begins at 09:00:00:

- **Start Timing Point:**

- **Open Time:** The open time should be set to 00:00:00 (the event start time). And please do not set to 09:00:00, which means the event starts at 18:00:00.
- **Close Time:** The close time must be set to a time after the last participant has passed the start timing point.

- **Finish Timing Point:**

- **Open Time:** The open time should be set to a time before the first participant passes the finish timing point.
- **Close Time:** The close time must be set to a time after the last participant has passed the finish timing point.

2. For this situation: same location for different timing points. For example, if a start point and a finish point are at the same location, the open time of the finish point must be later than the close time of the start point. This setup ensures that the timing system accurately records participants' start and finish time. If the finish point were open while participants are still starting, it could cause confusion and incorrect timing data.

- B. **Sort:** first time record and last time record: Normally, we take first time record at the start point and the last time record at the other timing points such as finish, check point.

Reason for the last time record at the start time: Choosing the last time ensures that the actual start time is used, particularly in races where participants may warm up or prepare near the start line.

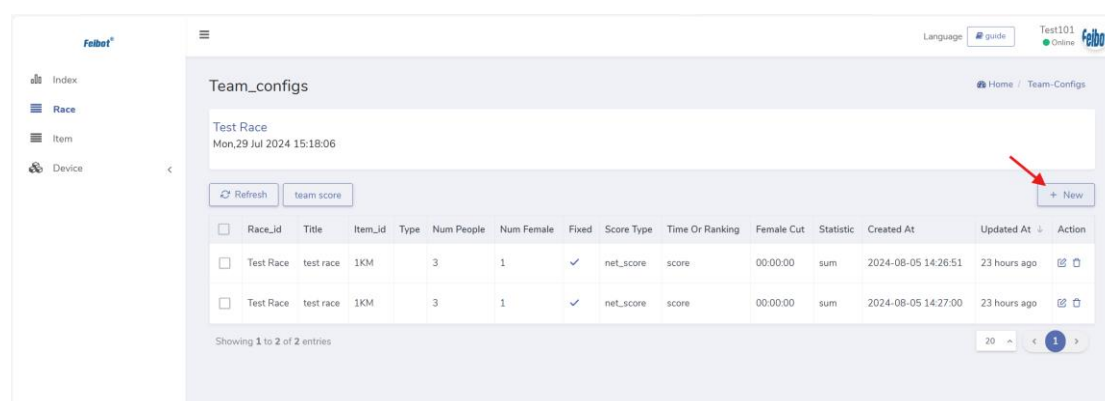

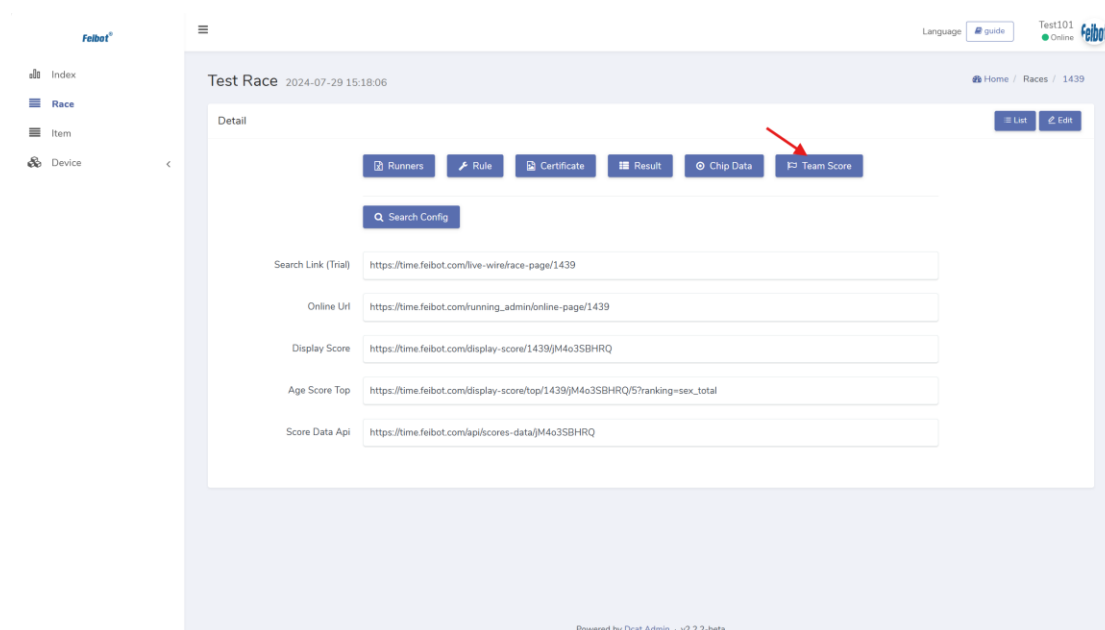

Reason for the first time record at the other timing points: The first crossing time typically represents the actual time the participant reaches a timing point, capturing the earliest valid time.

- C. **Fastest speed:** The maximum speed setting is a key component of the scoring software's calculation logic. It is used to filter out invalid data by excluding any readings that exceed the predefined speed threshold. This ensures that only realistic data is used in result calculations. The software uses this rule to validate that the results are within the

expected range of performance for the event. To maintain accuracy and fairness in scoring, the maximum speed setting should be configured based on actual event conditions or historical data. And it is also a baseline to set the open time for finish and check points.

If holding a team race, you still need to set team scoring rules:

Click “Team Score” to access the Team Configs interface. Then click “+New” to set team scoring rules by entering team details such as race name, item ID, number of participants, scoring methods.

4. Configure the score query(optional)

Click on **Search Config** to open the query configuration interface. Then select a language from the dropdown menu and upload a banner image from your local files. After completing the configuration, a link titled “Search Link” will be generated on the “Race Interface.” Finally, open this link in a browser to view participants’ scores by entering their bib numbers or names.

- 3) **View Rankings:** Click “refresh_ranking” to rank these participants. You can also check the rankings for different categories like item and gender through filter.

The screenshot shows the 'Result' page for a 'Test Race' on Mon, 29 Jul 2024 at 15:18:06. The page has a sidebar with navigation icons and a top bar with 'Language' and 'Test101 Online' status. The main content area has tabs for 'Race', 'Runner', 'Rule', 'Certificate', 'Result' (selected), and 'Chip Data'. Below the tabs is a toolbar with buttons: 'Refresh', 'Filter', 'calculate', 'finish/lock', 'clear_scores', 'refresh_ranking' (highlighted with a red box), 'Import', 'Export Setting', and 'PDF'. Below the toolbar is a table with 13 columns: Bib, Name, Item, Gender, Gun Time, Net Time, Gender Rank (Gun Time), Gender Rank (Chip Time), Start Time, Finisher, Check In, Updated At, and Action. The table contains 3 entries for 1KM items. Below the table is a 'Summary' section with a table showing counts for 'All' and '1KM' items.

Bib	Name	Item	Gender	Gun Time	Net Time	Gender Rank (Gun Time)	Gender Rank (Chip Time)	Start Time	Finisher	Check In	Updated At	Action
1001	Joy	1KM	m	00:03:41	00:03:40			00:00:01	Valid		1 second ago	
1002	Ross Gellar	1KM	m	00:04:02	00:04:00			00:00:02	Valid		1 second ago	
1003	Chandler	1KM	m	00:03:05	00:03:02			00:00:03	Valid		1 second ago	

Item	Start	Finish
All	3	3
1KM	3	3

The screenshot shows the 'Result' page with the 'refresh_ranking' modal open. The modal has a title bar 'refresh_ranking' and a close button. It contains two sections: '* Item Ids' with a dropdown menu showing '1KM' (highlighted with a red box), and '* Ranking' with two checkboxes: 'Result' (checked) and 'Age Result' (checked). There are 'Reset' and 'Submit' buttons at the bottom of the modal. The background shows the same 'Result' page as the previous screenshot, but it is dimmed.

4) **Export Results:** Export the final results in various formats (PDF, Excel).
